Description

Maxwarm is a professional steam eye mask manufacturer who can provide custom service. Factory outlet, quality assurance, steady delivery and wholesale price.

How to use steam eye mask?

After opening the package, the steam eye mask will start to heat up when it comes into contact with the air, so use it immediately. Hook the eye mask on both ears, close your eyes, and feel its moisturizing quietly.

Although the sheet-type steam eye mask warmer is simple to use, there are actually some points that need to be paid attention to. E.g:
Do not use in the following situations:

1. For example, those with eye diseases or abnormal conditions such as injuries, swelling, eczema and so on around the eyes;
2. If the removed eye mask is damaged, it may cause damage to the internal material and easily cause safety hazards;
3. Sensitive to metal materials and peripheral materials;

Also note:

1. Don't let the little babies at home touch it;
2. Avoid direct sunlight and place in a cool and dry place;
3. We are made of environmentally friendly materials. Although they are disposable products, as long as they are treated like normal garbage, there is no need to worry about pollution to the environment.
