Description

Find a great collection of foot warmers from the best foot warm patches manufacturer. Custom your own brand foot warmers with factory price.

Main ingredients: iron powder, water, activated carbon, vermiculite, water-absorbent resin, table salt, wormwood extract.

Product characteristics: This foot warmer is used to keep the feet warm. It can be placed in loose shoes and can generate heat above 40 degrees for 12 hours.

Applicable people: The warm foot patch can be applied to all kinds of people who need to keep their feet warm.

The 7 advantages of our warm foot patch:

1. Waterproof, oxygen-proof, high-density outer packaging.
2. Stable heating and lasting warmth.
3. High-purity iron powder, high-quality activated carbon
4. The iron powder is evenly distributed.
5. High-quality non-woven fabric, good air permeability.
6. Three layers of protective film, more secure.
7. Environmentally friendly adhesive, free of benzene.

Instructions for use:

1. Open the package and take out the warm patch.
2. Remove the peeling paper, stick the foot warmer on the sole or back of the foot, and smooth it with your hand.
